

# Tennessee Basic Education Program BEP 2.0

Nashville, TN 37243-1050

This booklet lists the Basic Education Program (BEP) components and the cost specifications for each component. The components include both operating and capital outlay costs.

The BEP components serve as the basis for calculating the level of funding for each school system. These components represent the level of support necessary for our schools to succeed. While the components serve as the basis for calculating the level of BEP funding for each school system, the BEP does not prescribe specific levels of expenditures for individual components. Actual costs of the essential components are monitored and updated from year to year. Total costs are calculated by applying cost specifications to the schools' census data.

Equity adjustments (cost of operations adjustment and fiscal capacity adjustment) equalize responsibility among the local school systems based on variations in the cost of delivering services to students and in relative fiscal capacity.

## **SALARIES USED IN BEP CALCULATIONS**

### **Teachers and Other Licensed Personnel**

**The BEP allocation for salaries for each school system is based on:**

**The number of each type of position generated by the cost components**

**The current salary unit cost for instructional personnel = \$44,430**

**Average annual superintendent salary = \$106,400 per county**

### **Other Personnel**

**Average annual library/instructional assistant salary = \$22,100**

**Average annual custodian salary = \$23,800**

**Average annual school secretary salary = \$31,100**

**Average annual system secretary salary = \$39,800**

## **FOOTNOTES**

\*The instructional salaries and benefits (FICA, TCRS and medical insurance) have been separated into two separate categories in the BEP formula. They both have a state share of 70%.

\*\* If a system within a county having more than one system does not have enough pupils to qualify for a position, the relevant county totals are used and each system receives a pro rata share based on its proportion of total relevant enrollment. If county totals are not sufficient to generate a position, the county is allocated one position and each system is allocated a pro rata share of the position based on its proportion of the relevant enrollment.

\*\*\*Elementary schools < 100 are not allocated a principal.

\*\*\*\*One superintendent is allocated for each county. If there is more than one school system in a county, each system receives a pro rata share based on its proportion of total county ADM.

\*\*\*\*\*For purposes of calculating benefits and insurance: for maintenance add 60% of sq. ft. cost to salary allocation; for pupil transportation add 45% of amount to salary allocation. Apply calculated rate (insurance, FICA, TCRS) for classified personnel as specified to 60% or 45% of allocation, respectively.
